

§ 905.40

Basin Program—Eastern Division, Western will offer contracts to existing customers for resource extensions no sooner than the effective date of the final regulations. For the Loveland Area Projects, existing contracts provide for potential adjustments to marketable resources in 1999. No contracts will be offered to existing customers for post-2004 Loveland Area Projects resources until the analysis of potential resource adjustments in 1999 has been completed and any adjustments are implemented. Existing power sales contracts require that this analysis be completed by 1996.

Subpart D—Energy Services

§ 905.40 Technical assistance.

Western shall establish a program that provides technical assistance to customers to conduct integrated resource planning, implement applicable IRPs and small customer plans, and otherwise comply with the requirements of these regulations.

PART 950—STANDBY SUPPORT FOR CERTAIN NUCLEAR PLANT DELAYS

Subpart A—General Provisions

Sec.

950.1 Purpose.

950.2 Scope and applicability.

950.3 Definitions.

Subpart B—Standby Support Contract Process

950.10 Conditional agreement.

950.11 Terms and conditions of the Conditional Agreement.

950.12 Standby Support Contract Conditions.

950.13 Standby Support Contract: General provisions.

950.14 Standby Support Contract: Covered events, exclusions, covered delay and covered cost provisions.

Subpart C—Claims Administration Process

950.20 General provisions.

950.21 Notification of covered event.

950.22 Covered event determination.

950.23 Claims process for payment of covered costs.

950.24 Claims determination for covered costs.

950.25 Calculation of covered costs.

10 CFR Ch. III (1–1–09 Edition)

950.26 Adjustments to claim for payment of covered costs.

950.27 Conditions for payment of covered costs.

950.28 Payment of covered costs.

Subpart D—Dispute Resolution Process

950.30 General.

950.31 Covered event dispute resolution.

950.32 Final determination on covered events.

950.33 Covered costs dispute resolution.

950.34 Final claim determination.

950.35 Payment of final claim determination.

950.36 Other contract matters in dispute.

950.37 Final agreement or final decision.

Subpart E—Audit and Investigations and Other Provisions

950.40 General.

950.41 Monitoring/Auditing.

950.42 Disclosure.

AUTHORITY: 42 U.S.C. 2201, 42 U.S.C. 7101 *et seq.*, and 42 U.S.C. 16014

SOURCE: 71 FR 46325, Aug. 11, 2006, unless otherwise noted.

Subpart A—General Provisions

§ 950.1 Purpose.

The purpose of this part is to facilitate the construction and full power operation of new advanced nuclear facilities by providing risk insurance for certain delays attributed to the Nuclear Regulatory Commission regulatory process or to litigation.

§ 950.2 Scope and applicability.

This part sets forth the policies and procedures for the award and administration of Standby Support Contracts between the Department and sponsors of new advanced nuclear facilities.

§ 950.3 Definitions.

For the purposes of this part:

Act means the Energy Policy Act of 2005.

Advanced nuclear facility means any nuclear facility the reactor design for which is approved after December 31, 1993, by the Nuclear Regulatory Commission (and such design or a substantially similar design of comparable capacity was not approved on or before that date).

Department of Energy

§ 950.3

Available indemnification means \$500 million with respect to the initial two reactors and \$250 million with respect to the subsequent four reactors.

Claims administrator means the official in the Department of Energy responsible for the administration of the Standby Support Contracts, including the responsibility to approve or disapprove claims submitted by a sponsor for payment of covered costs under the Standby Support Contract.

Combined license means a combined construction and operating license (COL) for an advanced nuclear facility issued by the Commission.

Commencement of construction means the point in time when a sponsor initiates the pouring of safety-related concrete for the reactor building.

Commission means the Nuclear Regulatory Commission (NRC).

Conditional Agreement means a contractual agreement between the Department and a sponsor under which the Department will execute a Standby Support Contract with the sponsor if and only if the sponsor is one of the first six sponsors to satisfy the conditions precedent to execution of a Standby Support Contract, and if funding and other applicable contractual, statutory and regulatory requirements are satisfied.

Construction means the construction activities related to the advanced nuclear facility encompassed in the time period after commencement of construction and before the initiation of fuel load for the advanced nuclear facility.

Covered cost means:

(1) Principal or interest on any debt obligation financing an advanced nuclear facility (but excluding charges due to a borrower's failure to meet a debt obligation unrelated to the delay); and

(2) Incremental costs that are incurred as a result of covered delay.

Covered delay means a delay in the attainment of full power operation of an advanced nuclear facility caused by a covered event, as defined by this section.

Covered event means an event that may result in a covered delay due to:

(1) The failure of the Commission to comply with schedules for review and

approval of inspections, tests, analyses and acceptance criteria established under the combined license;

(2) The conduct of pre-operational hearings by the Commission for the advanced nuclear facility; or

(3) Litigation that delays the commencement of full power operations of the advanced nuclear facility.

Department means the United States Department of Energy.

Full power operation means the point at which the sponsor first synchronizes the advanced nuclear facility to the electrical grid.

Grant account means the account established by the Secretary that receives appropriations or non-Federal funds in an amount sufficient to cover the amount of incremental costs for which indemnification is available under a Standby Support Contract.

Incremental costs means the incremental difference between:

(1) The fair market price of power purchased to meet the contractual supply agreements that would have been met by the advanced nuclear facility but for a covered delay; and

(2) The contractual price of power from the advanced nuclear facility subject to the delay.

Initial two reactors means the first two reactors covered by Standby Support Contracts that receive a combined license and commence construction.

Litigation means adjudication in Federal, State, local or tribal courts, including appeals of Commission decisions related to the combined license process to such courts, but excluding administrative litigation that occurs at the Commission related to the combined license process.

Loan cost means the net present value of the estimated cash flows of:

(1) Payments by the government to cover defaults and delinquencies, interest subsidies, or other payments; and

(2) Payments to the government including origination and other fees, penalties and recoveries, as outlined under the Federal Credit Reform Act of 1990.

Pre-operational hearing means any Commission hearing that is provided for in 10 CFR part 52, after issuance of the combined license.

Program account means the account established by the Secretary that receives appropriations or loan guarantee fees in an amount sufficient to cover the loan costs.

Program administrator means the Department official authorized by the Secretary to represent the Department in the administration and management of the Standby Support Program, including negotiating with and entering into a Conditional Agreement or a Standby Support Contract with a sponsor.

Related party means the sponsor's parent company, a subsidiary of the sponsor, or a subsidiary of the parent company of the sponsor.

Secretary means the Secretary of Energy or a designee.

Sponsor means a person whose application for a combined license for an advanced nuclear facility has been docketed by the Commission.

Standby Support Contract means the contract that, when entered into by a sponsor and the Program Administrator pursuant to section 638 of the Energy Policy Act of 2005 after satisfaction of the conditions in § 950.12 and any other applicable contractual, statutory and regulatory requirements, establishes the obligation of the Department to compensate covered costs in the event of a covered delay subject to the terms and conditions specified in the Standby Support Contract.

Standby Support Program means the program established by section 638 of the Act as administered by the Department of Energy.

Subsequent four reactors means the next four reactors covered by Standby Support Contracts, after the initial two reactors, which receive a combined license and commence construction.

System-level construction schedule means an electronic critical path method schedule identifying the dates and durations of plant systems installation (but excluding details of components or parts installation), sequences and interrelationships, and milestone dates from commencement of construction through full power operation, using software acceptable to the Department.

Subpart B—Standby Support Contract Process

§ 950.10 Conditional agreement.

(a) *Purpose.* The Department and a sponsor may enter into a Conditional Agreement. The Department will enter into a Standby Support Contract with the first six sponsors to satisfy the specified conditions precedent for a Standby Support Contract if and only if all funding and other contractual, statutory and regulatory requirements have been satisfied.

(b) *Eligibility.* A sponsor is eligible to enter into a Conditional Agreement with the Program Administrator after the sponsor has submitted to the Department the following information but before the sponsor receives approval of the combined license application from the Commission:

(1) An electronic copy of the combined license application docketed by the Commission pursuant to 10 CFR part 52, and if applicable, an electronic copy of the design certification or early site permit, or environmental report referenced or included with the sponsor's combined license application;

(2) A summary schedule identifying the projected dates of construction, testing, and full power operation;

(3) A detailed business plan that includes intended financing for the project including the credit structure and all sources and uses of funds for the project, the most recent private credit rating or other similar credit analysis for project related covered financing, and the projected cash flows for all debt obligations of the advanced nuclear facility which would be covered under the Standby Support Contract;

(4) The sponsor's estimate of the amount and timing of the Standby Support payments for debt service under covered delays; and

(5) The estimated dollar amount to be allocated to the sponsor's covered costs for principal or interest on the debt obligation of the advanced nuclear facility and for incremental costs, including whether these amounts would be different if the advanced nuclear facility is one of the initial two reactors or one of the subsequent four reactors.
